

WHO WE ARE

Vivid Operational Advisors is a consulting firm that approaches every engagement with a fundraiser's eye. We remove what is in the way so nonprofits can raise more money. That means we edit before we build, subtract before we add, and hand back operations that run without us in the room.

WHAT WE BUILD

Every system we build is designed to strengthen the infrastructure underneath your fundraising.

People own the work.

Tools run the work.

Guides document the work.

HOW WE PARTNER

FUNDRAISING OPERATIONS AUDITS

Something is costing you and you cannot yet name it. An intake, a survey, a focused listening session, and a written plan with a decision and a sequence. You leave knowing what to do first and what to leave alone.

INFRASTRUCTURE BUILDS

The fix has been on the list for months and keeps losing to the work. We scope it to one system, build it on your timeframe, and hand it to you documented and running with clear ownership and documentation.

OPERATIONAL TRANSITIONS

The structure that got you here will not get you there. Three months to rebuild your systems and operating model until they fit the size you actually are. Bounded from the start, handed back clean when it is done.
